The Provider and the Client are each a "Party" and together the "Parties".

Background

(A) The Client operates a freight forwarding business and needs a managed data platform to consolidate shipment, warehouse and billing data from its regional offices.

Service credits are deducted from the next invoice and are the Client's sole financial remedy for a failure to meet the availability level.

2.7 Subcontractors. The Provider may use subcontractors to perform part of the Services, provided that it informs the Client in writing in advance and remains fully responsible for their work.

3. Fees and Payment
